

SMS TIPSTER MEDIA BOX

Looking good from all sides.

A double function - what is not to love? With the SMS Tipster Media Box you will get hidden storage and a clean look. This clever accessory will hide cables or a media player on the back of the Tipster floorstand, giving the installation that extra touch.

The look of the unit will be clean and stylish. The mounting interface inside the box is adjustable.

Choose between fastening the media player with screws or cable ties (not incl.). The SMS Tipster Media Box has slots for ventilation and is compatible with a padlock (not incl.). Please see the technical drawing for maximum space inside the compartment.
