

Wireless meetings

The way we work has changed. People are growing increasingly accustomed to working in a mobile BYOC (Bring Your Own Codec) world, working from their own familiar devices.

Huddle Room Technology has created the Huddle Hub that allows you to connect your meeting room USB camera to Huddle Hub and enable any participant to wirelessly receive its AV streams for a video conferencing session. Huddle Hub supports most UC software, hardware devices and video conferencing platforms all while enabling you to wirelessly share content.
